Secure and reliable open banking using APIs to share financial data between banks and third-party providers

Fast and easy regulation adoption

Simplified access to core system data and robotic process automation capabilities for recurring rule-based tasks

Easier scaling and operation of core, transactional and digital systems

Advanced UI/UX to help enable increased employee productivity

Reliable insight into financial forecasts, client transactional behaviors and more

The banking industry is at a crossroads. Financial institutions are skillfully navigating the challenges of adapting swiftly to ever-evolving customer demands while facing stringent regulatory requirements and relentless competition. In this context, a strategic blend of innovation and transformation is paramount to success.

Your core banking systems have long served as the foundation of your operations. However, the current landscape suggests a shift toward modernization. This presents an opportunity to enhance your digital infrastructure and refine your banking processes and technologies.

With Unisys Core Banking Solution, seamless operations, whether on-premises or in the cloud, have become a reality, ensuring smooth integration with your essential core banking systems. With Unisys' partner ecosystem, you are well positioned to deliver better customer experiences and maintain a competitive edge.

Banking modernization is a team sport

Tap into a network of expertise and advanced solutions to address fraud protection, biometrics and more.

Evolve better — together

Core banking, a vital aspect of banking operations, benefits significantly from modernization aimed at enhancing agility and operational efficiency. Since adopting new technologies can strain an institution's capacity to build, design and manage the emerging infrastructure, this is an area where partnerships can be highly impactful.

Partner ecosystems help financial institutions access a broad range of expertise and technology solutions. They are instrumental in refining operations, enhancing customer experience and enabling competitive differentiation. Unisys' partner ecosystem provides access to industry-leading solutions, including Thought Machine's Vault solutions, which provide banks with extensive control and the flexibility to build and run new financial products and services.

Additionally, Unisys offers proprietary regional core banking solutions that support a variety of needs, from retail banking to small and medium-sized enterprise banking and specialized mortgage solutions. A regional approach allows for specialized help in complying with local regulations and market practices for LATAM, UK, EMEA and APAC.

How you benefit

Supercharge employee productivity: The solution's refreshed user interface and user experience (UI/UX) capabilities empower peak workforce performance, ensuring optimal efficiency and client satisfaction. With Unisys, your employees are equipped to deliver exceptional service.

Leverage data for strategic decision-making: Unisys Core Banking seamlessly integrates with data lakes and third-party systems, fueling your analytics engine with rich insights. This interconnectivity allows you to tap into the true potential of your data, becoming the source of intelligence for understanding client needs, forecasting results, analyzing transactional behaviors and enhancing commercial management dashboards.

Access a comprehensive banking ecosystem: Access a robust suite of capabilities covering all aspects of banking operations. From managing deposits, loans, services and debit and credit cards to collections, accounting, payments, transfers, anti-money laundering and regulatory reporting, Unisys supplies a comprehensive and integrated platform.
